

# Federation Day 2023

**We Make The Future:  
Fighting for the Schools Our Students Deserve**

## **DIANA HONG**

**WORKSHOP FACILITATOR**

### **Building a Thinking Classroom in Elementary**

Join Diana as she explores the benefits of, and practical steps to implementing a Building Thinking Classroom. You will learn what to expect, how to adapt, and where to find resources and supports throughout your journey. Engagement, assessment, and getting our students thinking critically, it's time to see what BTC is, and how you can make it work for you and your students.

#### **ABOUT DIANA**

With twelve years as a K-8 classroom teacher, two years as a K-12 Math Coach, Diana is combining both this year as the Elementary Hybrid MLP for the TDSB. In the morning she teaches Grade 5/6 as a demonstration classroom, implementing Building Thinking Classrooms and High-Impact Instructional Practices in Mathematics, and in the afternoon she coaches, mentors, and co-teaches with educators from across the TDSB.

**Off-Site Session** at Federation Day 2023  
Afternoon Program  
Friday, December 8, 2023
